Journal of Materials Processing Technology 59 (1996) 398–400

Journal of Materials Processing Technology

Contents of Volume 59

Special Issue: Selected papers on Sheet Forming and Stamping and Forging and Machining, from the Engineering Research Center for Net Shape Manufacturing, The Ohio State University, Columbus, OH 43210, USA

Preface ix

1. Sheet Forming and Stamping

Prediction of process conditions in drawing and ironing of cans 1
M. Schünemann, M.A. Ahmetoglu, T. Altan (Columbus, OH, USA)
Bending, flanging, and hemming of aluminum sheet–an experimental study 10
A. Muderrisoglu (Columbus, OH, USA), M. Murata (Tokyo, Japan), M.A. Ahmetoglu, G.L. Kinzel, T. Altan (Columbus, OH, USA)
Investigation of different loading conditions in a high speed mechanical press 18
J. Breitling, D. Wallace, T. Altan (Columbus, OH, USA)
Process and die design for multi-step forming of round parts from sheet metal 24
S.K. Esche, S. Khamitkar, G.L. Kinzel, T. Altan (Columbus, OH, USA)
Elastic deflections of the blank holder in deep drawing of sheet metal. 34
L. Shulkin (Columbus, OH, USA), S.W. Jansen (Detroit, MI), M.A. Ahmetoglu, G.L. Kinzel and T. Altan (Columbus, OH, USA)
Computer aided simulation of cold roll forming–a computer program for simple section profiles 41
N. Duggal, M.A. Ahmetoglu, G.L. Kinzel, T. Altan (Columbus, OH, USA)
Applications of viscous pressure forming (VPF) to low volume stamping of difficult-to-form alloys–results of preliminary FEM simulations 49
J. Liu, B. Westhoff, M.A. Ahmetoglu and T. Altan (Columbus, OH, USA)
Simulations of roll forming process with the 3D FEM code PAM-STAMP. 59
F. Heislitz, H. Livatyali, M.A. Ahmetoglu, G.L. Kinzel, T. Altan (Columbus, OH, USA)
Material fracture and burr formation in blanking–results of FEM simulations and comparison with experiments 68
E. Taupin, J. Breitling, W.T. Wu, and T. Altan (Columbus, OH, USA)

2. Forging and Machining

Flashless closed-die upset forging-load estimation for optimal cold header selection 81
M. O'Connell, B. Painter, G. Maul, T. Altan (Columbus, OH, USA)
Investigation of metal flow and preform optimization in flashless forging of a connecting rod. 95
T. Takemasu (Kyushu, Japan), V. Vazquez, B. Painter, T. Altan (Columbus, OH, USA)
Application of the finite element method to predict material flow and defects in the semi-solid forging of A356 aluminum alloys 106
(M. Koç, V. Vazquez (Columbus, OH, USA), T. Witulski (Simmerath, Germany), T. Altan (Columbus, OH, USA)
Prediction of hardness distribution in cold backward extruded cups 113
H. Kim (Osaka, Japan), S.M. Lee (Jinju, South Korea), T. Altan (Columbus, OH, USA)
Cold forging of steel–practical examples of computerized part and process design 122
H. Kim (Osaka, Japan), T. Altan (Columbus, OH, USA)
Prediction of die wear during hot-extrusion of engine valves 132
B. Painter, R. Shivpuri, T. Altan (Columbus, OH, USA)
Tooling and process design to cold forge a cross groove inner race for a constant velocity joint-physical modeling and FEM process simulation 144
V. Vazquez (Columbus, OH, USA), K. Sweeney (Aachen, Germany), D. Wallace, C. Wolff, M. Ober, T. Altan (Columbus, OH, USA)

Survey of the die and mold manufacturing industry–practices in Germany, Japan and the United States 158
P. Fallböhmer, T. Altan (Columbus, OH, USA), H.-K. Tönshoff (Hannover, Germany), T. Nakagawa (Tokyo, Japan)
Application of 2-D FEM to chip formation in orthogonal cutting 169
E. Ceretti (Brescia, Italy), P. Fallböhmer, W.T. Wu, T. Altan (Columbus, OH, USA)
Author Index of Volume 59, Issue 1–2 181
Activities of the JSTP Committee on Environmental Issues 183
T. Sano (Ibaraki, Japan), K. Kawai (Yokohama, Japan)
Plastic working in Germany and related environmental issues 186
R. Kopp, A. Schmitz (Aachen, Germany)
Plastic working in the USA and related environmental issues 199
B. Avitzur (Bethlehem, PA, USA)
Plastic working in China and related environmental issues 205
R. Xueyu (Shanghai, People's Republic of China), Z. Decheng (Harbin, People's Republic of China), H. Yongbiao, C. Weimin (Huazhong, People's Republic of China)
Global environment and technology of plasticity: role of technology of plasticity in addressing global environmental issues 213
H. Kubotera (Tokyo, Japan)
R&D for technology to solve global warming 218
K. Honjo (Tokyo, Japan)
Recent trends of steel science and technology for environmental strategy 221
K. Nakajima (Futtsu-City, Chiba, Japan)
Environmental protection in the electronic and electrical industries 233
I. Ochiai (Tokyo, Japan)
Technology required for protection of the environment in the field of metal forming 239
M. Kiuchi (Tokyo, Japan)
Numerical simulation of the superplastic constrained bulging of sheet metals in cylindrical dies 243
Y. Li, P. Hu, Y. Cao (Changchun, People's Republic of China)
Improvements in some properties of non-ferrous metals by the application of the ball-burnishing process 250
A.M. Hassan, A.S. Al-Bsharat (Irbid, Jordan)
The application of electron beam welding for the joining of dissimilar metals: an overview 257
Z. Sun (Singapore, Singapore), R. Karppi (Espoo, Finland)
A study of the die-swell behaviour of rubber compounds during short-die extrusion 268
J.Z. Liang (Guangzhou, People's Republic of China)
Flow formulation FE metal-forming analysis with boundary friction via a penalty function 272
D. Vučina (Split, Croatia)
Statistical analysis of shrinkage variation for powder injection molding 278
N.H. Loh (Singapore, Singapore), R.M. German (University Park, PA, USA)
A computerized diagraph and matrix approach for evaluation of metal stamping layouts 285
R. Singh, G.S. Sekhon (New Delhi, India)
Determination of rupture time and strain rate in creep by means of the uniaxial tensile test 294
H.-K. Oh (Suwon, South Korea)
Evolution of the pore structure of a ceramic powder compact during sintering 297
G.Q. (Max) Lu (Brisbane, Australia)
Surface characteristics of magnetic-disk cutting using a single-crystal diamond tool in an ultraprecision lathe 303
J.-D. Kim, D.-S. Kim (Taejon, South Korea)
A study on microcutting for the configuration of tools using molecular dynamics 309
J.-D. Kim, C.-H. Moon (Taejon, South Korea)
Stability of a friction driver using a describing function 315
J.-D. Kim, C.-H. Moon (Taejon, South Korea)
Grooveless finish-rolling of square edge flats in a small section mill 320
S.-E. Lundberg (Gävle, Sweden)
Profiling of rollers for thread rolling 333
V. Ivanov (Rousse, Bulgaria)
Influence of the nature of optical fibers in materials treatment by Nd:YAG lasers 337
F. Lemoine, J.M. Jouvard, H. Andrzejewski, D.F. Grevey (Le Creusot, France)

Validation of processing maps for 304L stainless steel using hot forging, rolling and extrusion 343
S. Venugopal, S. Venugopal, P.V. Sivaprasad, M. Vasudevan, S.L. Mannan (Kalpakkam, Tamil Nadu, India), S.K. Jha, P. Pandey (hyderabad, Andara Pradesh, India), Y.V.R.K. Prasad (Bangalore, Karnataka, India)
A modified analysis of the backward extrusion of internally circular-shaped tubes from arbitrarily shaped billets by the upper-bound elemental technique 351
R.-S. Lee, C.-T. Kwan (Tainan, Taiwan, ROC)
The development of software for shaving cutter design 359
J.-D. Kim, D.-S. Kim (Taejon, South Korea)
Recent advances in the manufacturing of copper-base composites 367
F. Heringhaus, D. Raabe (Aachen, Germany)
Modeling the frictional boundary conditions in a rolling process 373
C.-H. Luo (Hunan, People's Republic of China)
Evaluation of IN718 disk-forging processes using the quality-loss function 381
Z.J. Luo, D. Liu (Xian, People's Republic of China)
On the extent of stretching during deep drawing 386
S. Qin, H.M. Shang, C.J. Tay, J.X. Mo (Singapore, Singapore)
A mathematical model study on the die-less drawing of variable-section tubular parts 391
Z.T. Wang, G.F. Luan, G.R. Bai (Shenyang, People's Republic of China), K. Kobatake, H. Sekiguchi (Nara, Japan)

Short Communication

A note on the variation of Young's modulus, absorptive power of impactive energy, fracture toughness and creep strain rate during the creep process 394
H.-K. Oh (Suwon, South Korea)
